Practica 01

López Bautista José Luis PROFESOR

Yeudiel Hernández Torres

AYUDANTES

Raúl Ríos Ciriaco Virgilio Castro Rendón

ASIGNATURA

Administración de Sistemas Unix/Linux

4 de diciembre de 2024

1. Desarrollo

Para empezar nos registramos en Broadcom una vez que se realizó todo este proceso, descargamos VMware workstation Pro para uso personal, nos descarga un ejecutable para Windows, realizamos la instalación habitual. Luego vamos al sitio oficial del Debian, en este navegamso hacia las imagenes de instalación, al final llegamos a este link:https://cdimage.debian.org/debian-cd/current/amd64/iso-dvd/. Una vez descargada la imagen realizamos la creación de la máquina virtual, dejamos el tamaño recomendado del disco:

Figura 1: Tipo de maquina

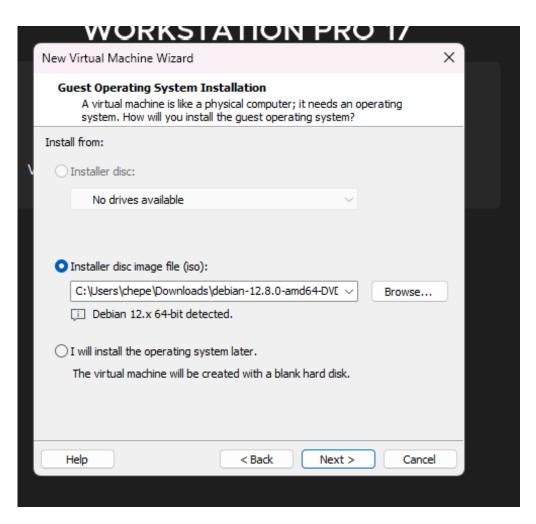

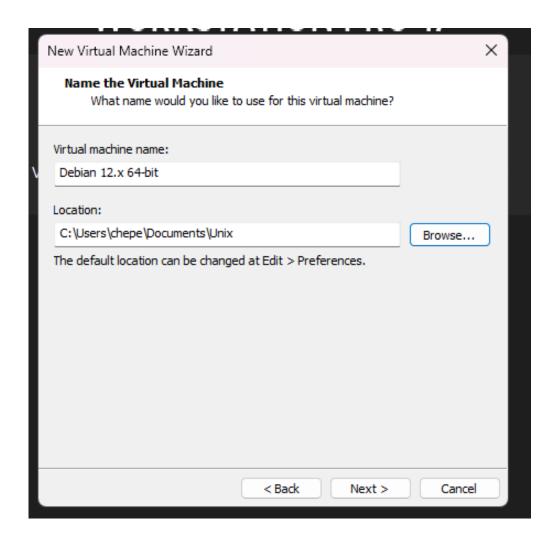

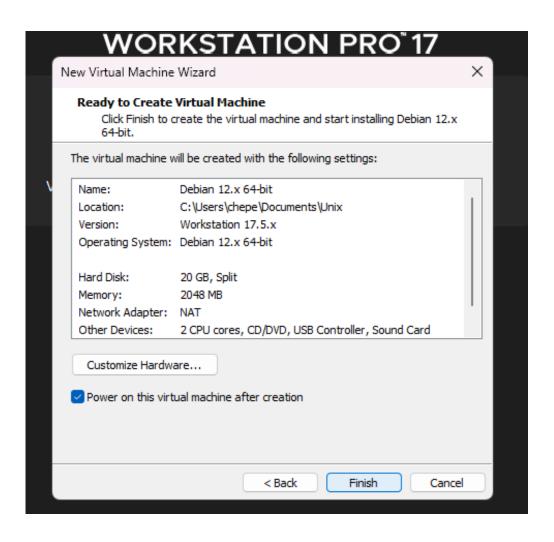

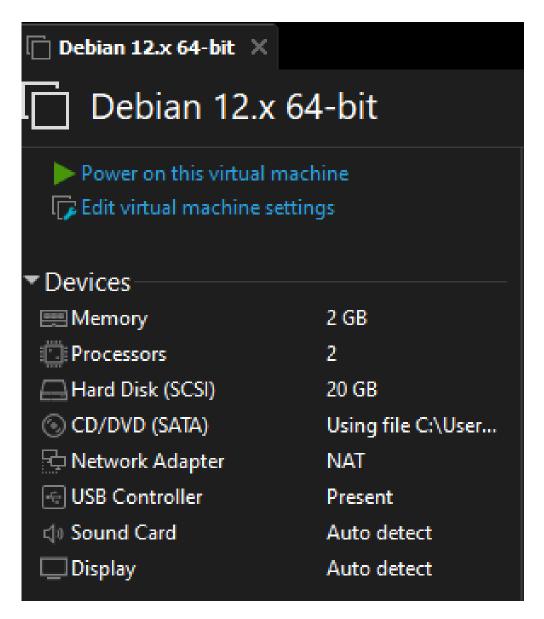

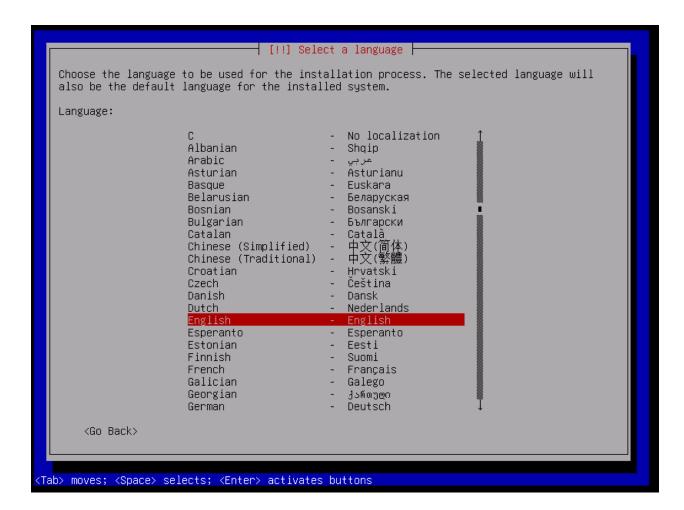

Figura 2: Imagen Iso

Encendemos la máquina y realizamos el proceso de instalación sin interfaz gráfica:

```
[!!] Select your location

The selected location will be used to set your time zone and also for example to help select the system locale. Normally this should be the country where you live.

Listed are locations for: North America. Use the <Go Back> option to select a different continent or region if your location is not listed.

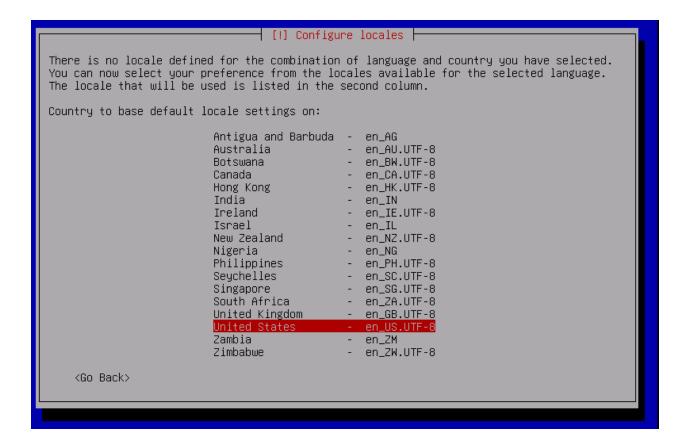

Country, territory or area:

Canada

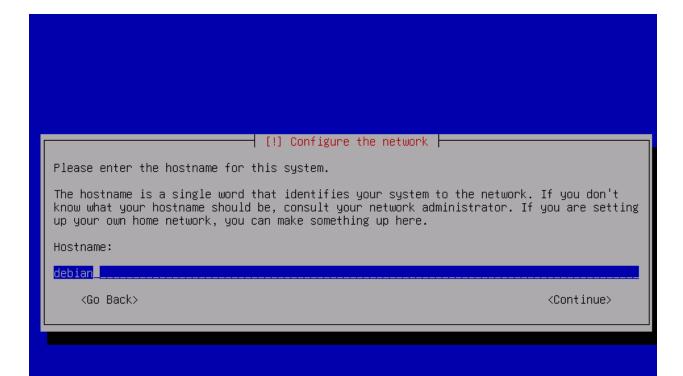

Mexico

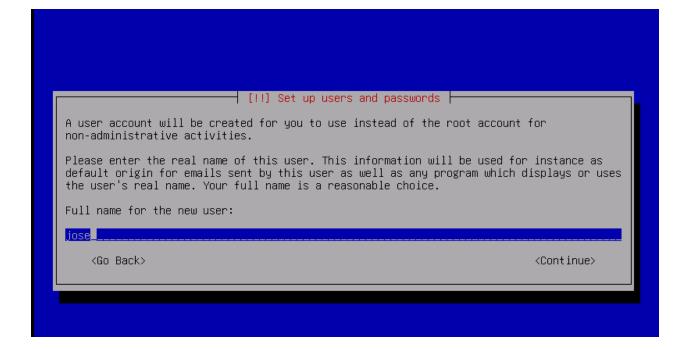

Saint Pierre and Miquelon
United States

<Go Back>
```

Definimos el hostname y para root y el usuario definimos la contraseña de acceso:

Para la partición realizamos una sin LVM

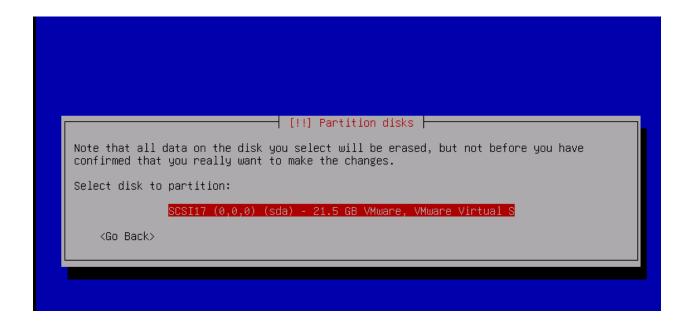

```
The installer can guide you through partitioning a disk (using different standard schemes) or, if you prefer, you can do it manually. With guided partitioning you will still have a chance later to review and customise the results.

If you choose guided partitioning for an entire disk, you will next be asked which disk should be used.

Partitioning method:

Guided - use entire disk
Guided - use entire disk and set up LVM
Guided - use entire disk and set up encrypted LVM
Manual

<Go Back>
```

Por último configuramos el los paquetes y seleccionamos la particion que usara el boot loader

[!] Configure the package manager Please select a Debian archive mirror. You should use a mirror in your country or region if you do not know which mirror has the best Internet connection to you. Usually, deb.debian.org is a good choice. Debian archive mirror: deb.debian.org ftp.us.debian.org debian.csail.mit.edu mirrors.lug.mtu.edu debian.cc.lehigh.edu mirror.us.oneandone.net mirrors.bloomu.edu mirrors.namecheap.com mirrors.ocf.berkeley.edu debian.mirror.constant.com mirror.cogentco.com mirror.us.leaseweb.net mirrors.accretive-networks.net debian.cs.binghamton.edu mirror.steadfast.net mirror.keystealth.org debian.uchicago.edu mirrors.wikimedia.org mirror.siena.edu mirror.pit.teraswitch.com plug-mirror.rcac.purdue.edu

<Go Back>

[!] Configuring grub-pc You need to make the newly installed system bootable, by installing the GRUB boot loader on a bootable device. The usual way to do this is to install GRUB to your primary drive (UEFI partition/boot record). You may instead install GRUB to a different drive (or partition), or to removable media. Device for boot loader installation: Enter device manually /dev/sda <Go Back>
